

CWBP NEWS – NOVEMBER 2015

In 2014 the City contracted with an engineering consulting firm to provide design services for the necessary reconstruction or repaving of the streets located within the Central Wisconsin Business Park. In January 2015, the Council reviewed the cost estimates developed by the engineering design consultant for the reconstruction/repaving of the Business Park streets and the Council then directed the City's financial consultant to develop a financing plan for the identified street maintenance projects. The consultant developed a financing plan for the reconstruction of the streets that will be solely financed by Tax Increment District No. 2 funds.

At the September 14, 2015 meeting, the Council approved a resolution to issuance bonds for reconstruction of the following streets located within the Central Wisconsin Business Park over the next two years:

- **North View Drive (from Golf Club Blvd to Indianhead Drive)**
- **Indianhead Drive**
- **North Park View Circle**

The reconstruction of North View Drive was completed in October and the reconstruction of Indianhead Drive and North Park View Circle will be completed in 2016.
